

nanoCAD Construction Site

nanoCAD Construction Site

nanoCAD ConstructionSite is a specialized application that allows engineer easily develop a construction site plan and simplifies the planning and organization of the construction process. nanoCAD ConstructionSite is good at coping with both graphical and calculations tasks. Built using nanoCAD graphical kernel, nanoCAD ConstructionSite is a feature rich application that natively supports

Features

-  Dynamic Standard and Custom Library Objects
-  Site Layout Design and Drafting
-  Road Construction, Detailing and Calculation
-  HDD (Horizontal Directional Drilling) with reports
-  Floor Plan Construction with Annotation
-  General CAD Platform (i.e nanoCAD Plus)
-  Powerful Parametric and Versatile Annotating Tools
-  Safety on site
-  Site Project Management
(i.e Job analysis, Cost analysis, Materials and so on)

Difference between nanoCAD Construction and nanoCAD Construction Site

Feature	nanoCAD Construction	nanoCAD Construction Site
General nanoCAD		
Familiar Interface	√	√
Native .Dwg & .Dxf Support	√	√
Advanced Plot Tools	√	√
Universal 2D Drafting & Modify	√	√
Auto Dimension	√	√
Excel Type Table editor	√	√
Raster enhancement	√	√
Point Clouds support	√	√
Construction		
Inbuilt Object Library	√	√
Library Development	√	√
Title Border(International Standard)	√	√
Advanced Architectural Tools	√	√
Modification Tools	√	√
Room Explication	√	√
Different types Grid Point	√	√
Elevation mark	√	√
Notes	√	√
Welding Symbol	√	√
Construction Site		
Project management	x	√
Construction Site Plan	x	√
Building Area, Living Area	x	√
Infrastructures Tools(Fire, Water Supply, Electric line)	x	√
Road Types, Cross Section Of roads	x	√
Road Pavement Construction	x	√
Building Machine	x	√
Working Area, Danger Area	x	√
Safety Sign	x	√
Horizontal Direction Drilling (Soil)	x	√
Reports Template	x	√
